## ***ABSTRACT***

**IRA PARAMITA.** The Influence of Differentiation, Promotion and Positioning on Purchasing Decision of Honda Car in Makassar, (guided by **Jeni Kamase** and **Sabri Hasan**).

This research was conducted with the aim to: (1) analyze the effect of differentiation on purchasing decisions; (2) analyze the effect of promotion on decisions; (3) analyze the effect of positioning on purchasing decision.

This study uses primary data through a survey of 70 users of Honda cars in Makassar, the survey was conducted from September to November 2017. The data were analyzed using SPSS version 20.0 (Statistical Package for Social Science) program.

The results of this study indicate that differentiation, promotion and positioning have a positive and significant influence on purchasing decisions. The result of the determinant coefficient of 92.6% indicates that the independent variable can explain the dependent variable, while the remaining 7.4% is determined by the unknown variable and not excluded in this study.

**Keywords:** *Differentiation, Promotion, Positioning and Purchase Decision.*
